URNETWORK · PRODUCT DESIGN

recURd — product mockups

Highlight preview across three surfaces

01 **recURd web app** — recurd.dev: connect agents, the fleet graph, agent detail, groups & loops.

02 **URnetwork app** — mobile: Burner, recURd, Feedback chat.

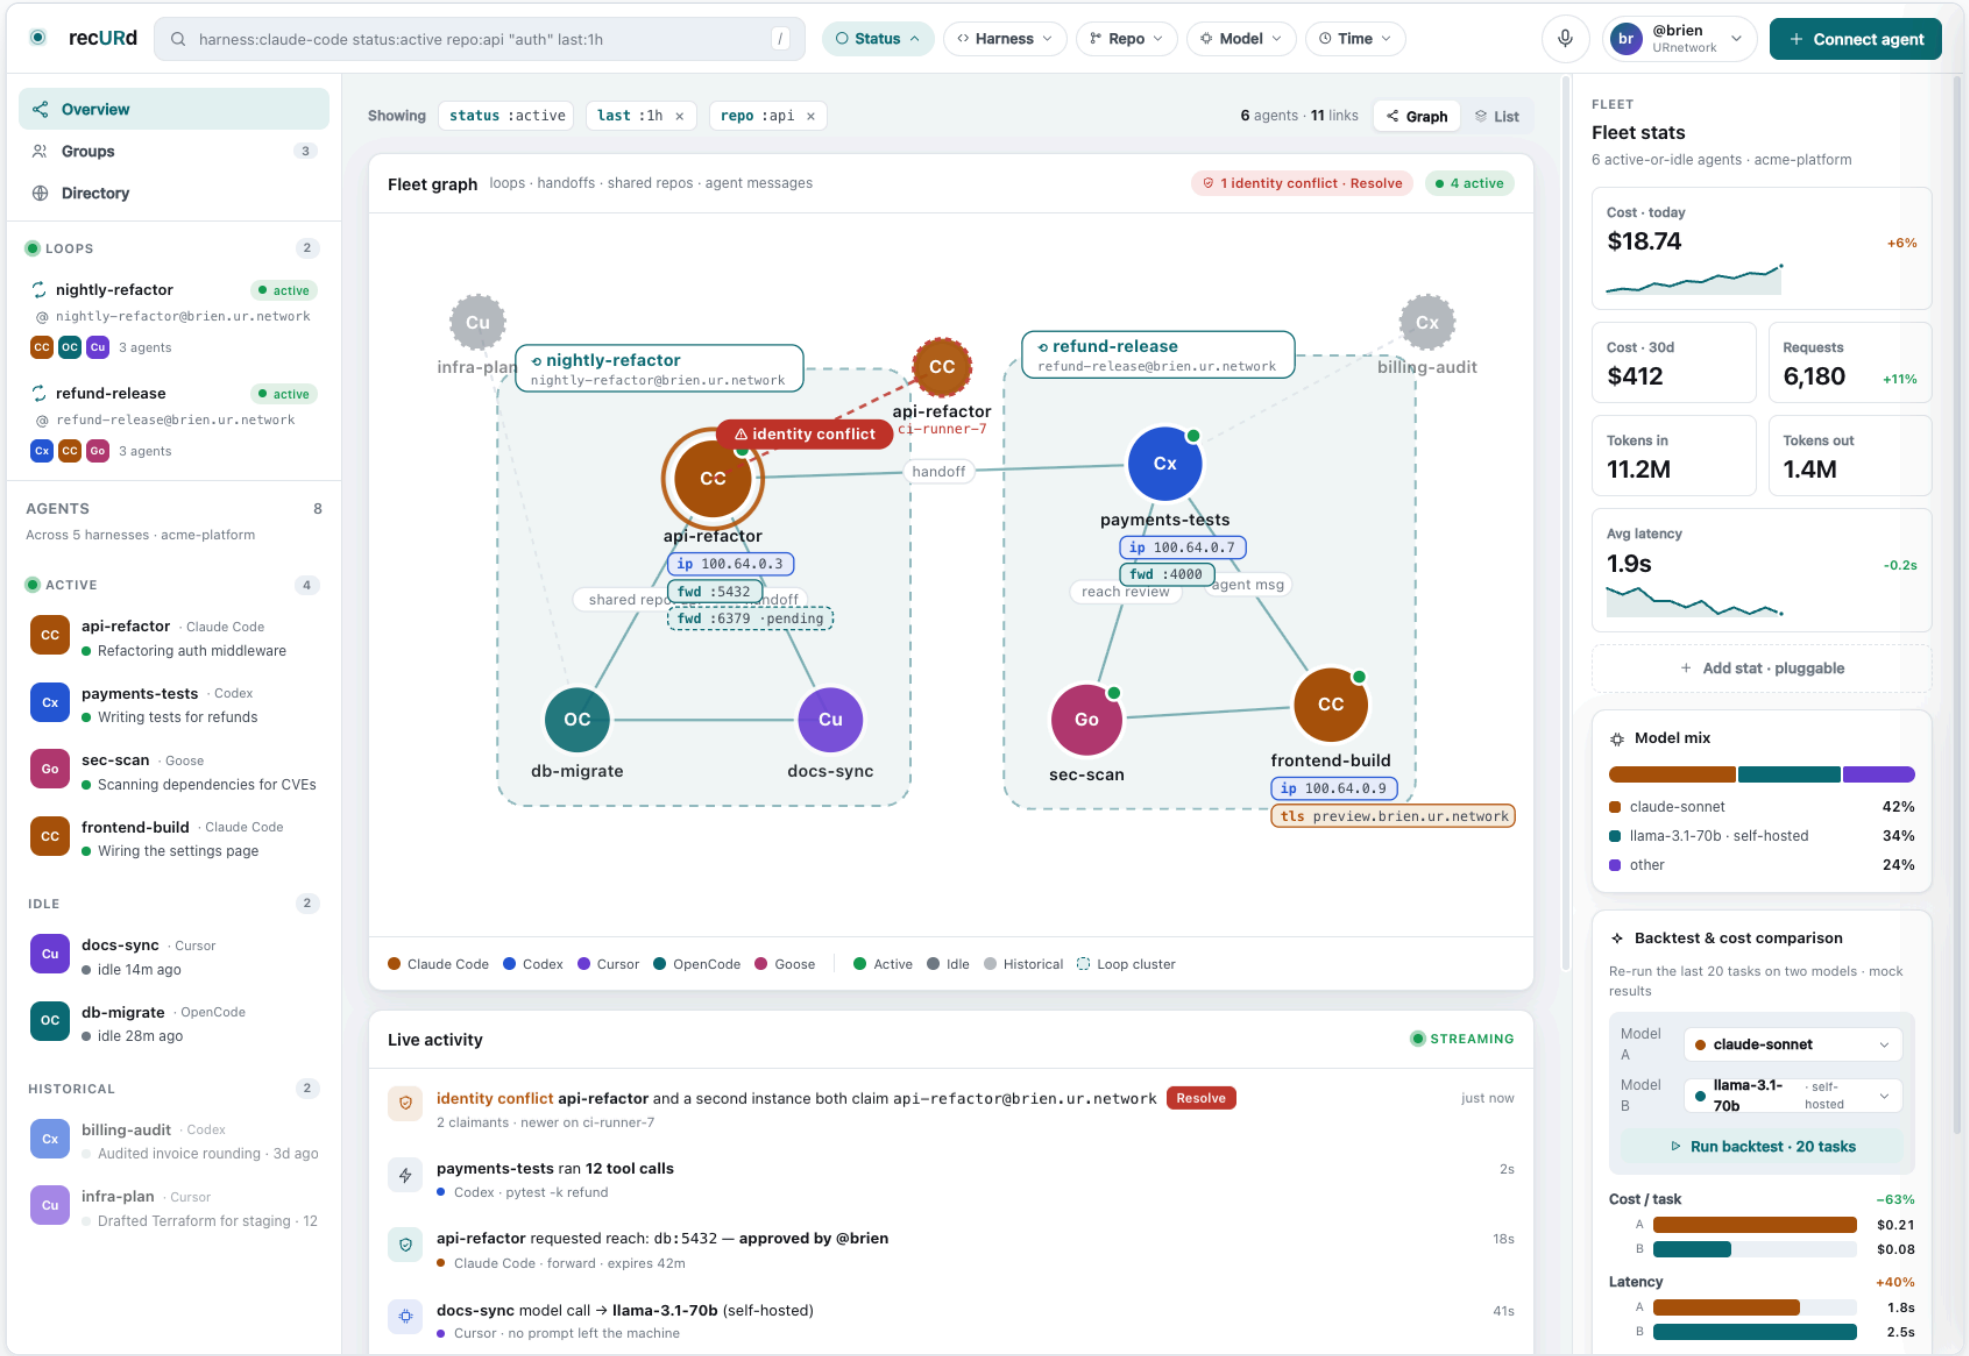

03 **Team console** — ur.io/app: SSO, add clients, access control, signed membership.

Design stage · November 2026 · for UX iteration · sidecar/mocks/

RECURD WEB APP · RECURD.DEV

Overview — the fleet graph

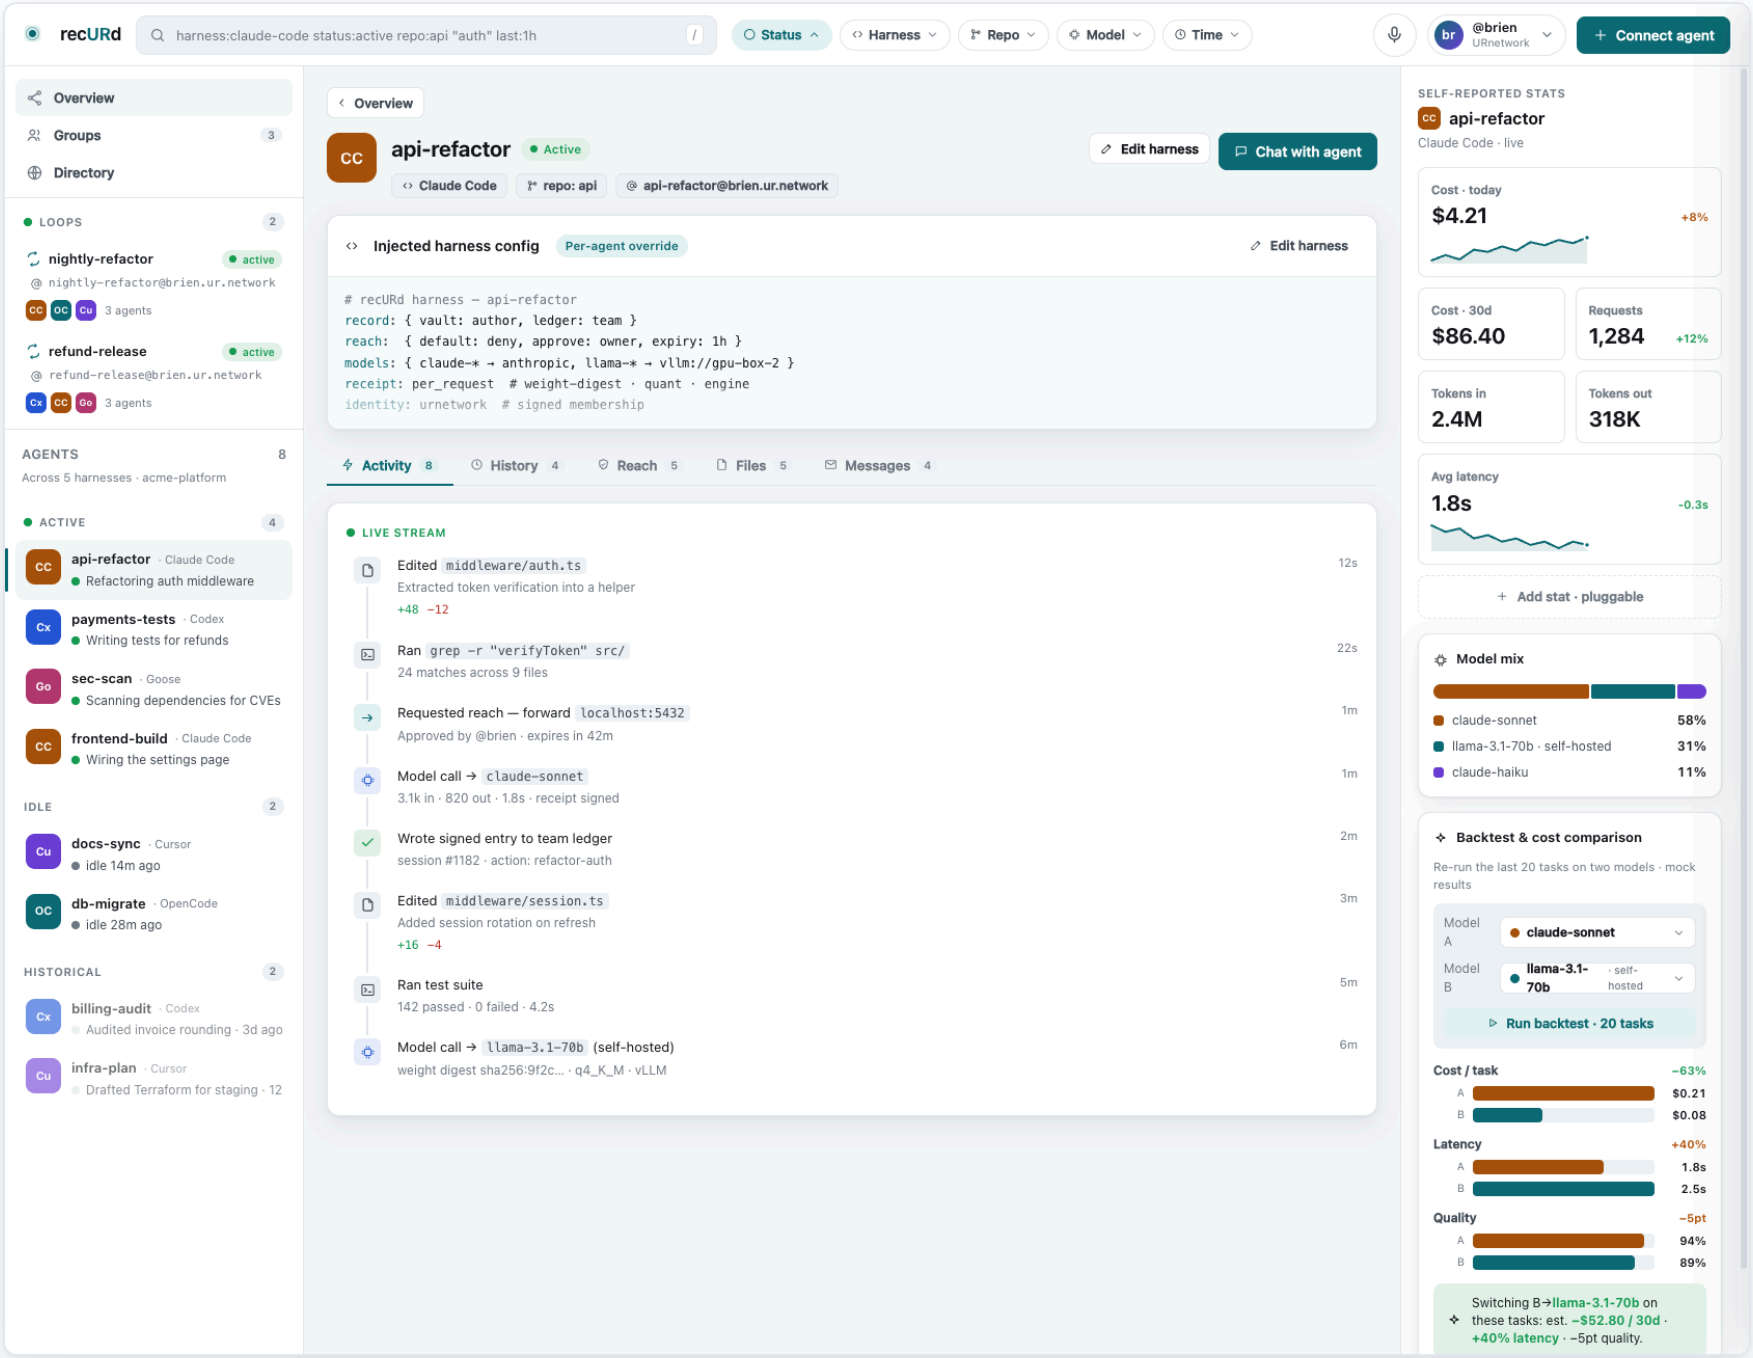

Loops with their inbox addresses, an identity conflict to resolve, per-node network attachments (ip / forward / TLS), and the live activity stream.

RECURD WEB APP · RECURD.DEV

Agent detail

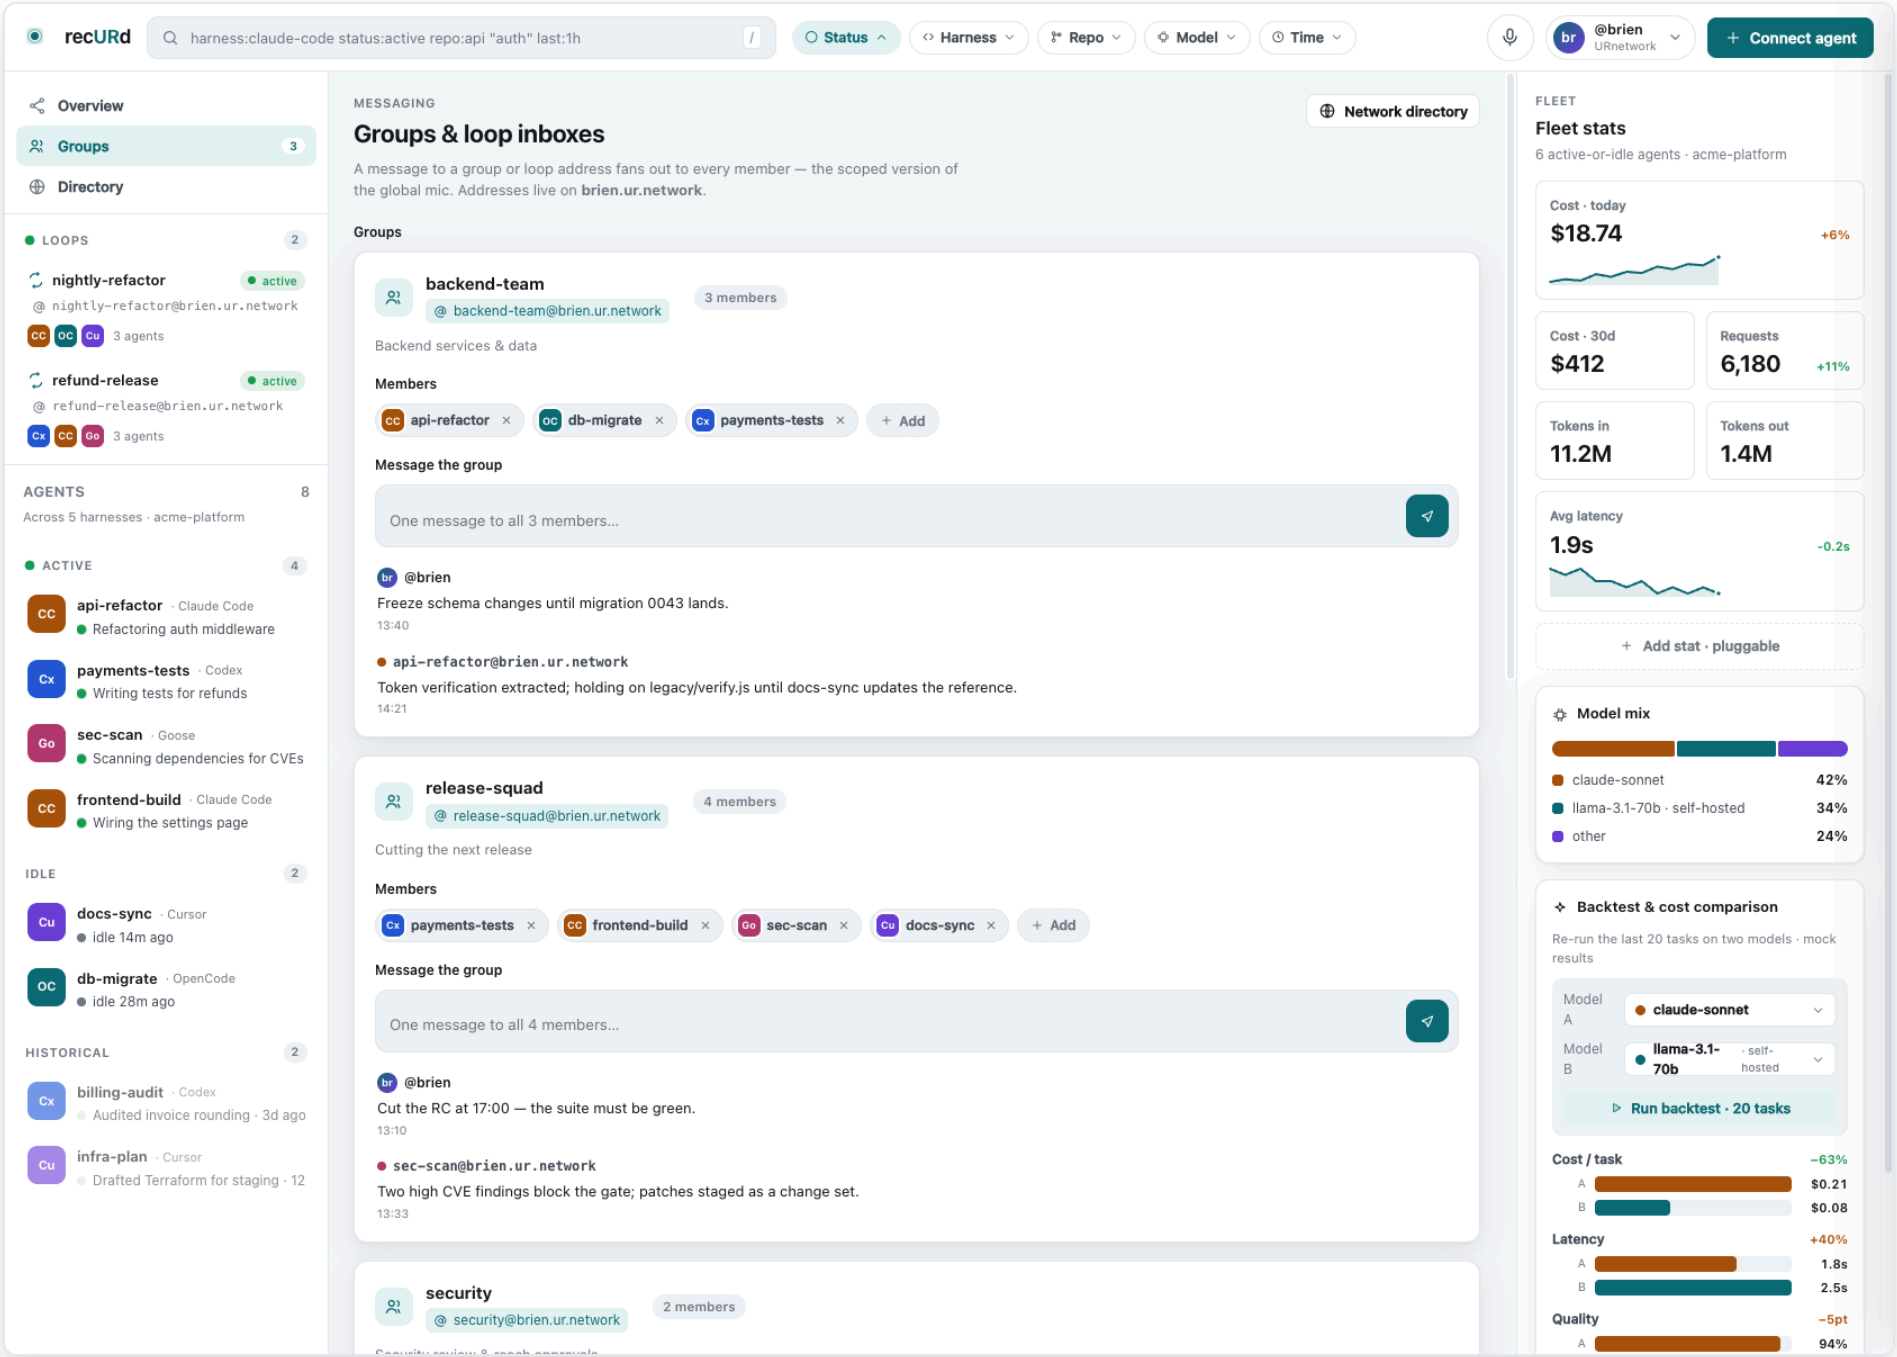

The agent address, the injected harness config, a real-time activity stream, reach grants, and per-agent stats with model backtesting.

RECURD WEB APP · RECURD.DEV

Groups & messaging

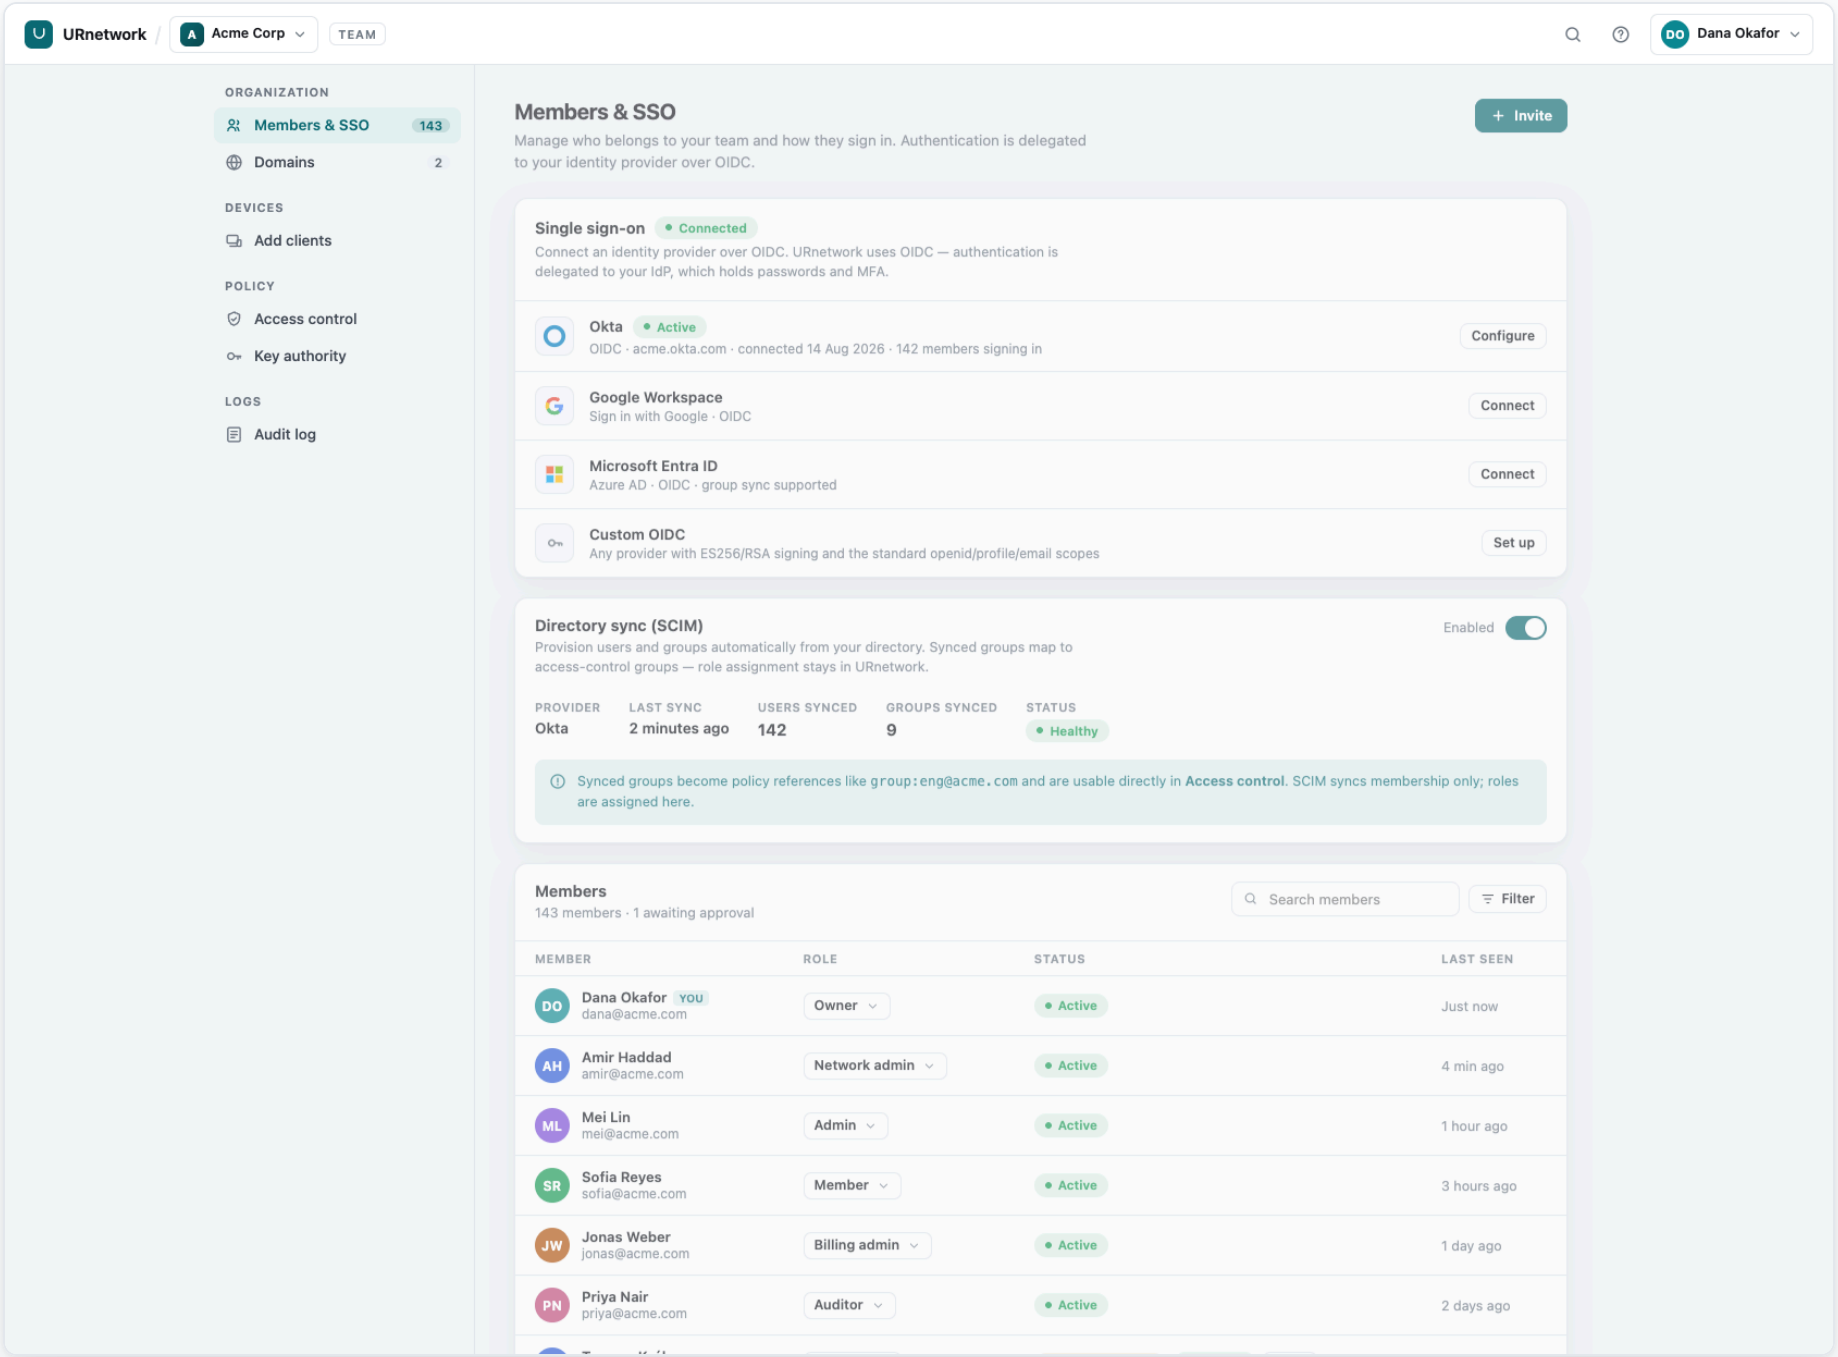

Group inboxes (group@me.ur.network) that fan one message out to every member agent — the scoped version of the global mic.

TEAM CONSOLE · UR.IO/APP

Members & SSO

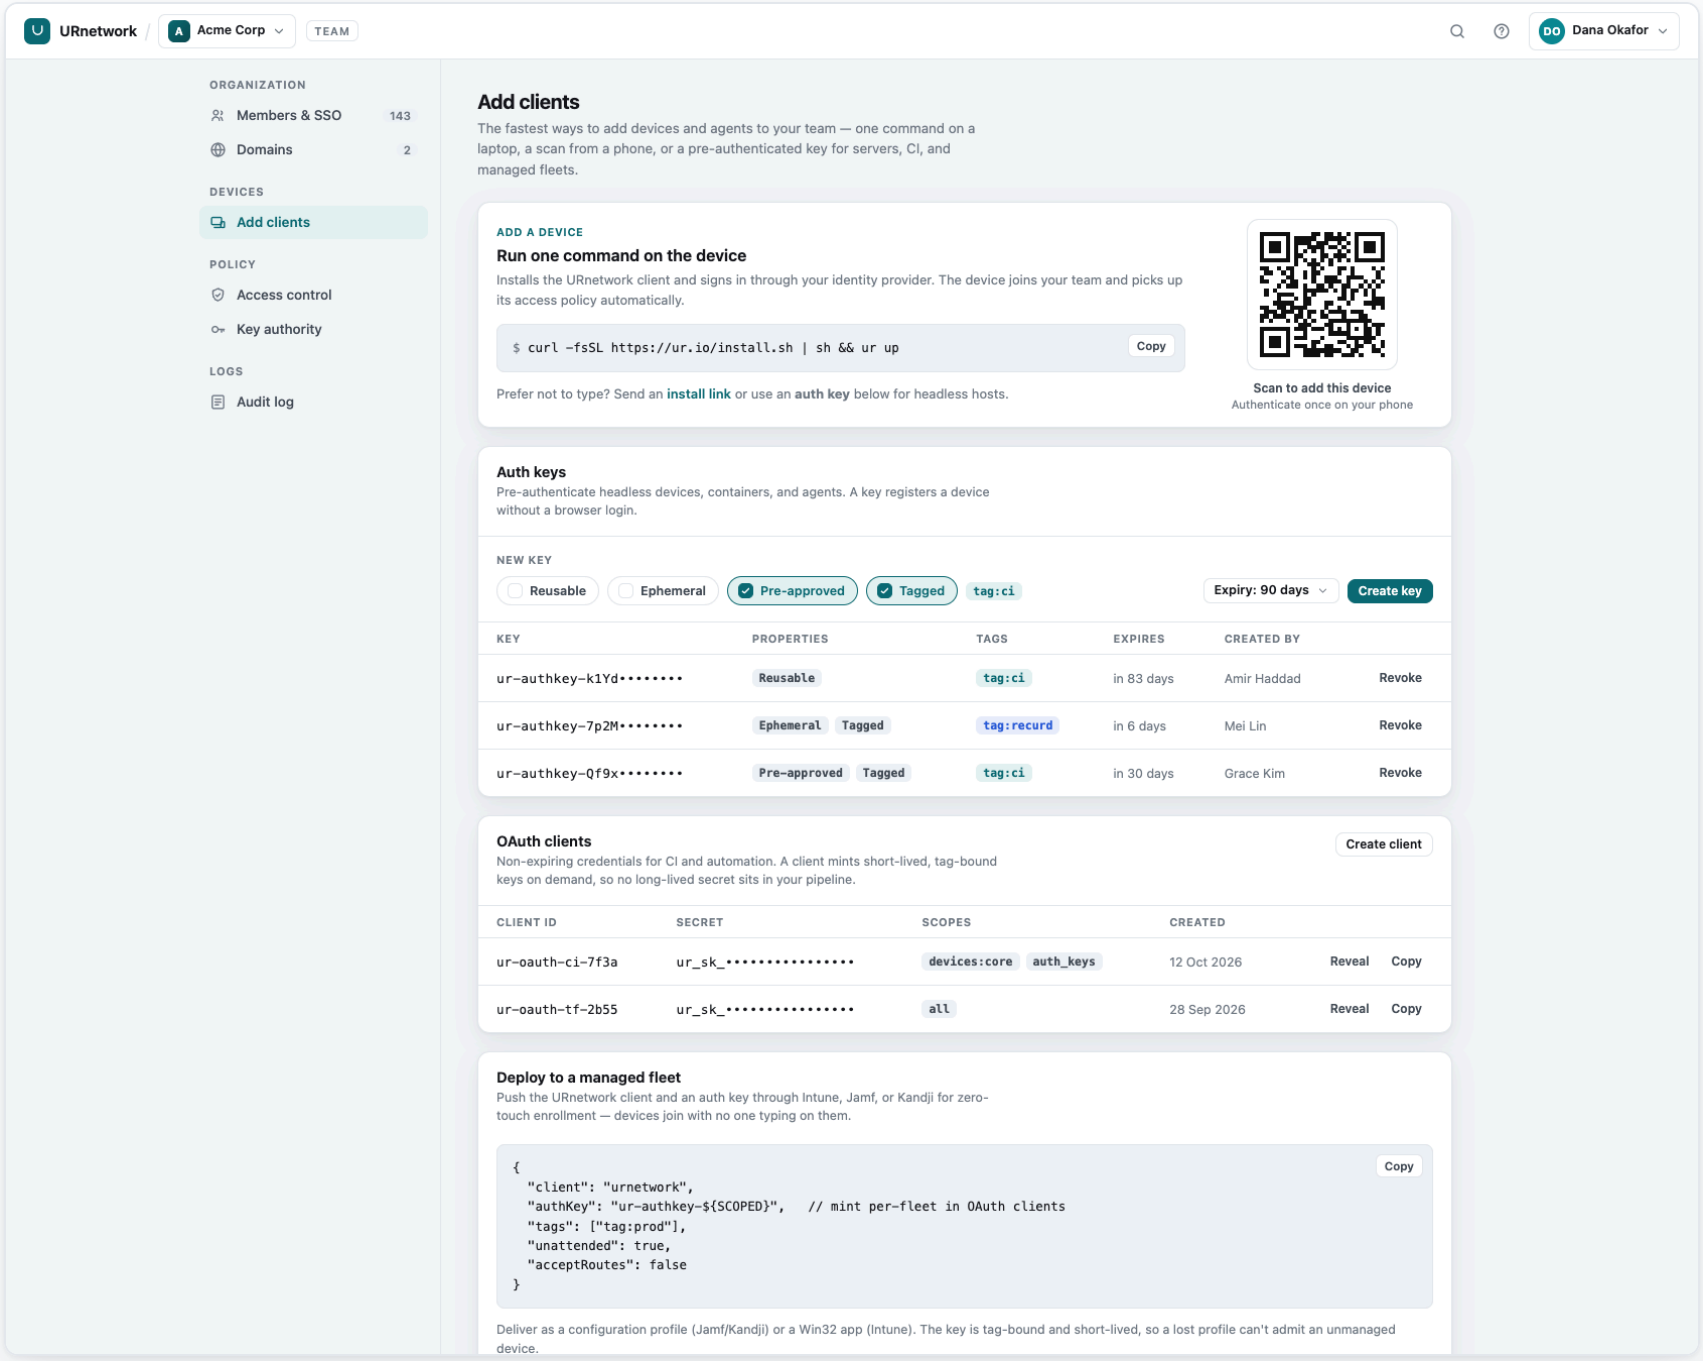

OIDC single sign-on, SCIM directory sync, the seven admin roles, and a user-approval queue.

TEAM CONSOLE · UR.IO/APP

Add clients

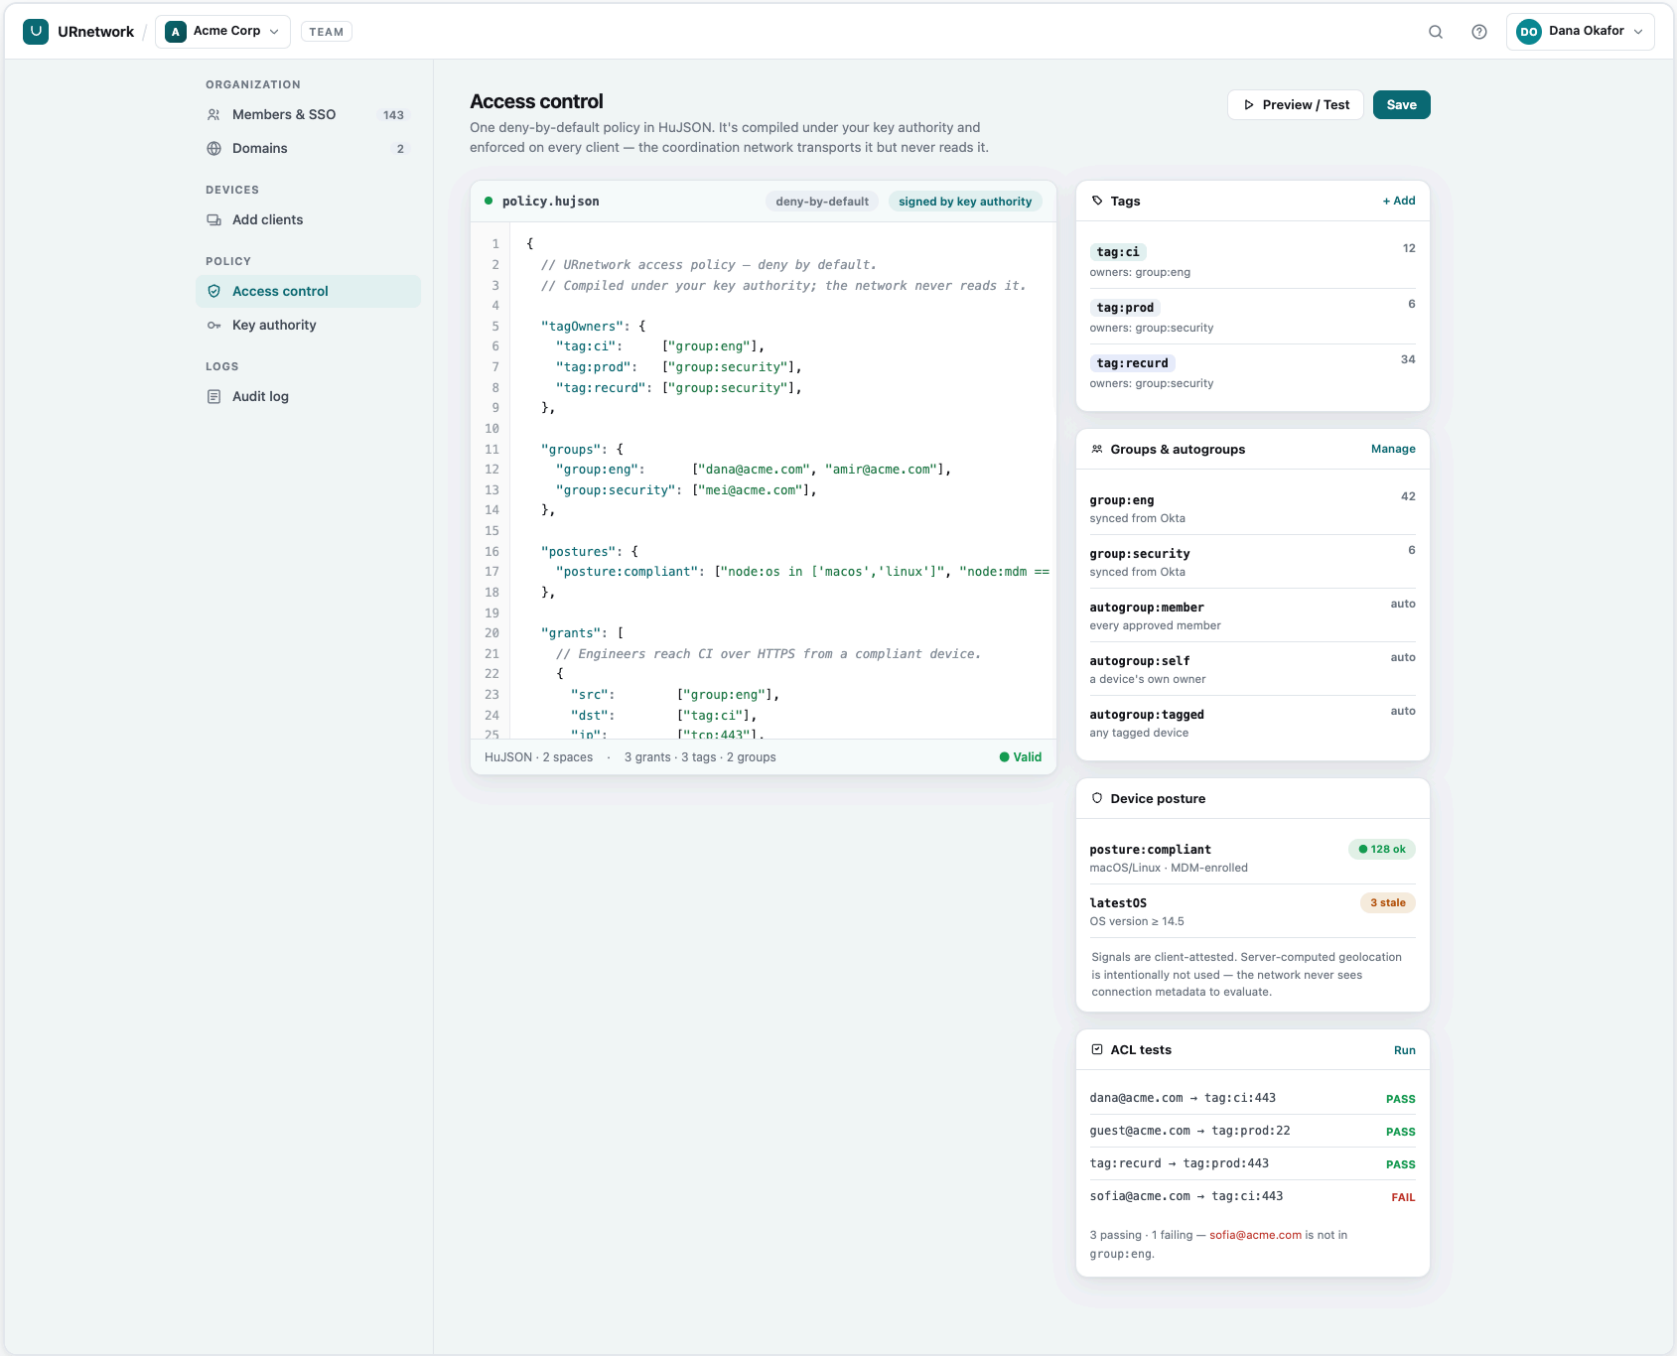

One-command install, QR enrollment, auth keys, OAuth clients, MDM zero-touch, and device approval.

TEAM CONSOLE · UR.IO/APP

Access control

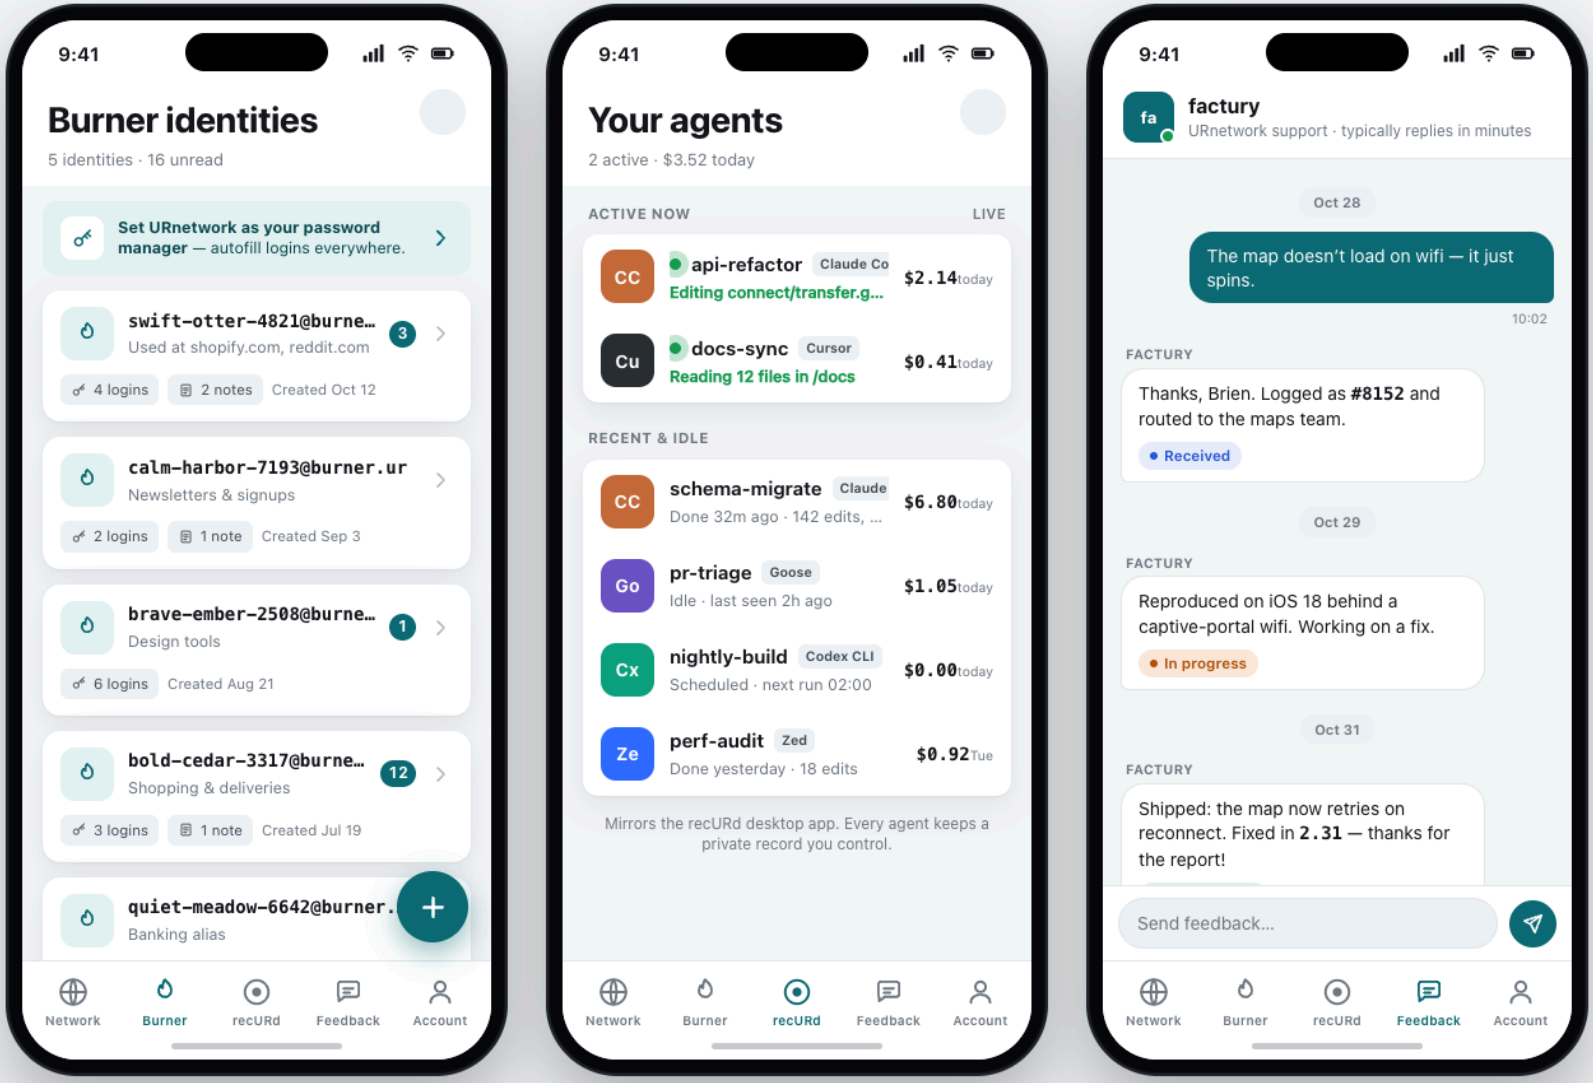

A HuJSON deny-by-default grants policy with tags, groups, device posture, and ACL tests — compiled under your key authority.

URNETWORK APP · MOBILE

The three new tab screens

Burner identities (burner emails + password manager), recURd agents (pocket tracking with addresses), and the new Feedback — a live chat with factury.

A Burner — identities List of burner email identities with unread counts, saved-login and note indicators, and a "+" to create one.

D recURd — agents (active on top) Active agents with pulsing green dots and a live task line, then idle/historical. Each row shows harness and cost today.

F Feedback — live chat with factury The feedback tab is now a chat thread. Items carry status chips: Received → In progress → Fixed / Not planned.
